

First you use the fill bucket to paint the background sky blue. Then you make three circles: the bottom one is the biggest, the middle one is the second largest, and the top is the smallest. Put them all in the middle of the screen going up and down. The three circles should be darker than the background. Make 4 black circular dots down the middle circle then add two twig like arms that are brown in the middle of the sides of the middle circle. Draw an orange carrot nose under two black eyes and above a black mouth that looks like it was made of coals. Make a top hat that is red on the inside and black on the outside. Then put 36 snowflakes in the background three rows going up and down six snowflakes in each row going side to side on each side of the snowman.
